Bartlett students create King’s Cross urban garden

3 Jul 2012

News from the Bartlett Faculty of architecture and urban design at University College London.

The garden and rooftop urban space at King’s Cross in London is the first of its kind to be designed by students for citizens, with the aim of enhancing public space experience and creating a new place for people to meet.

The garden, which is located above the entrance to the new St Pancras Hotel, will open to the public on 2 July in a collaboration between the Bartlett and the London Festival of Architecture.

In an initiative led by the Bartlett’s School of Architecture and Planning, students from the Faculty of Architecture and Urban Design have designed the garden in response to an open call to create a public space at the site.

The garden will feature a range of different spaces and planting, including seating areas, a plant nursery and a children’s garden. It will also be used for events and workshops, and will be open to the public from 2 to 11 July.

The students’ vision

Katharine McManus - Director of the Bartlett

A research-driven studio where students and partners collaborate to create sustainable, regenerative and citizen-inclusive public spaces. The studio works with local communities to develop projects that respond to their needs.

The Urban Room - by Rachael Tattu

A research-driven studio that focuses on the development of new urban spaces. The studio works with local communities to create spaces that are sustainable, regenerative and citizen-inclusive.

The Utopia Room - by Patrick Tappin

A research-driven studio that focuses on the development of new urban spaces. The studio works with local communities to create spaces that are sustainable, regenerative and citizen-inclusive.

The City Room - by Ian Littler

A research-driven studio that focuses on the development of new urban spaces. The studio works with local communities to create spaces that are sustainable, regenerative and citizen-inclusive.

The Garden Room - by Paulina Tajkova

A research-driven studio that focuses on the development of new urban spaces. The studio works with local communities to create spaces that are sustainable, regenerative and citizen-inclusive.

The Water Room - by Michelle Chen

A research-driven studio that focuses on the development of new urban spaces. The studio works with local communities to create spaces that are sustainable, regenerative and citizen-inclusive.

The Air Room - by Joshua Chen

A research-driven studio that focuses on the development of new urban spaces. The studio works with local communities to create spaces that are sustainable, regenerative and citizen-inclusive.

The Waste Room - by Charlotte Nott

A research-driven studio that focuses on the development of new urban spaces. The studio works with local communities to create spaces that are sustainable, regenerative and citizen-inclusive.

The Energy Room - by Reza Norouzi

A research-driven studio that focuses on the development of new urban spaces. The studio works with local communities to create spaces that are sustainable, regenerative and citizen-inclusive.

The Food Room - by Maxine Vardy

A research-driven studio that focuses on the development of new urban spaces. The studio works with local communities to create spaces that are sustainable, regenerative and citizen-inclusive.

The Health Room - by Marcia Vaz

A research-driven studio that focuses on the development of new urban spaces. The studio works with local communities to create spaces that are sustainable, regenerative and citizen-inclusive.

The Social Room - by Leila Vaz
